## ABOUT COMPANY

AdaIR Sdn Bhd is a progressive and innovative technology solutions provider dedicated to meeting the diverse needs of modern businesses. We specialize in system development, system integration, IoT software development, and consultation and training, offering a comprehensive range of services tailored to address unique operational challenges across industries.

Our mission is to empower organizations with cutting-edge solutions that drive operational efficiency, streamline data management processes, and ensure compliance with complex industry standards. At AdaIR, we recognize the growing demands of an interconnected world and are committed to providing advanced technological tools that enable businesses to stay competitive, adaptable, and sustainable in today's fast-evolving market.

What sets AdaIR apart is our unwavering commitment to excellence. We bring together a talented team of experts equipped with deep technical expertise and a collaborative approach to problem-solving. Our goal is to help organizations unlock the full potential of technology, fostering sustainable growth, enhancing productivity, and providing a significant competitive advantage.

Whether designing customized systems, integrating complex platforms, or developing IoT-driven solutions, AdaIR is dedicated to crafting innovative, reliable, and scalable solutions. By partnering with us, businesses gain access to future-ready technologies and a trusted ally committed to their success in an increasingly digital world.

# VISION & MISSION

## Vision

AdaIR Sdn Bhd is committed to delivering impactful and highly customized technology solutions that empower organizations to thrive in an increasingly dynamic and competitive environment. We aim to transform the way businesses operate by driving operational efficiency, ensuring robust security, and enabling scalable growth across a diverse range of industries. Our mission is to address the unique challenges of each client by providing innovative, practical, and sustainable technological solutions that create measurable and lasting value.

## Mission

Our vision is to become a globally recognized and trusted partner for technology-driven solutions, renowned for our commitment to innovation, adaptability, and excellence. We aspire to shape the future of businesses by continuously advancing our expertise in system development, integration, IoT software, and training services. By fostering meaningful collaborations and leveraging emerging technologies, AdaIR aims to create transformative impacts that empower organizations worldwide to achieve their goals while contributing positively to the broader technological and economic landscape.

## OUR EXPERTISE

### System Development

Our team designs and builds custom software systems tailored to meet the unique needs of each client, enhancing operational efficiency and productivity.

### System Integration

AdaIR offers integration services to unify various platforms, sensors, and devices, ensuring smooth data flow and interoperability across organizational systems.

### IoT Software Development

Our IoT solutions enable seamless connectivity between physical assets and digital platforms, supporting real-time monitoring, automation, and predictive maintenance.

### Consultation & Training

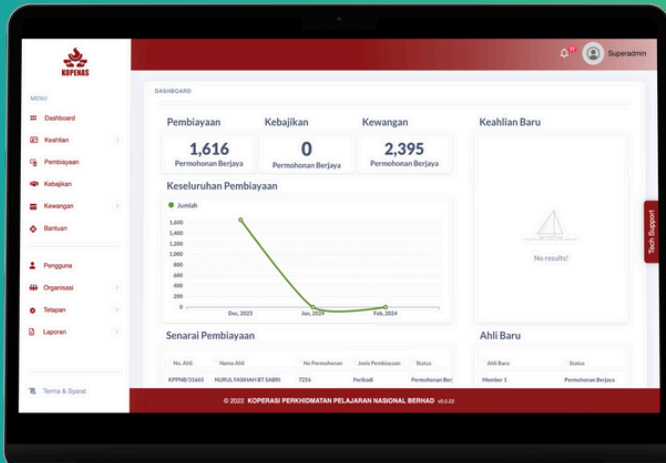

We offer specialized consultation and training programs to help clients maximize the utility of new technologies, ensuring smooth adoption and long-term sustainability.

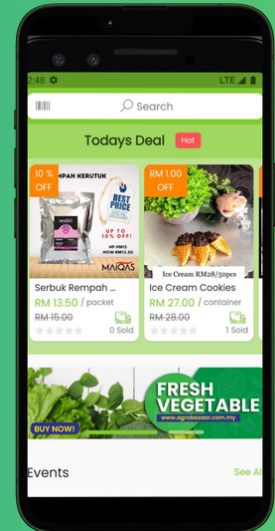

# PAST PROJECTS

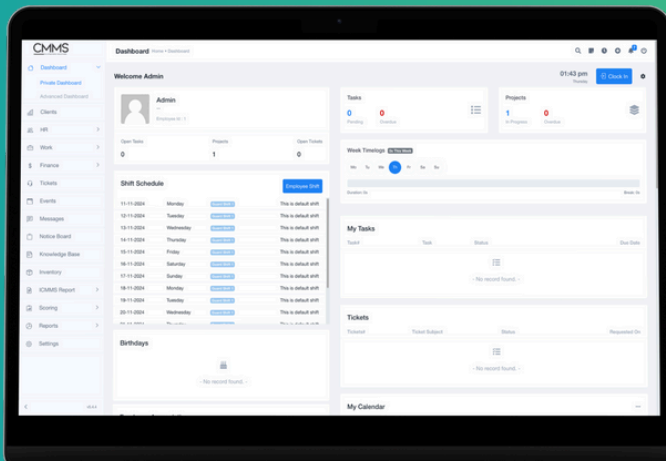

## System Development

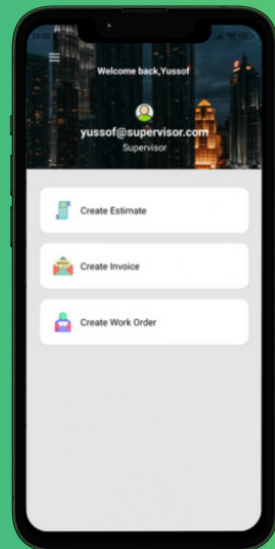

Kopenas : Koperasi Management System

Agrobazaar : E-commerce Mobile Application

CMMS : Computerized Maintenance Management System

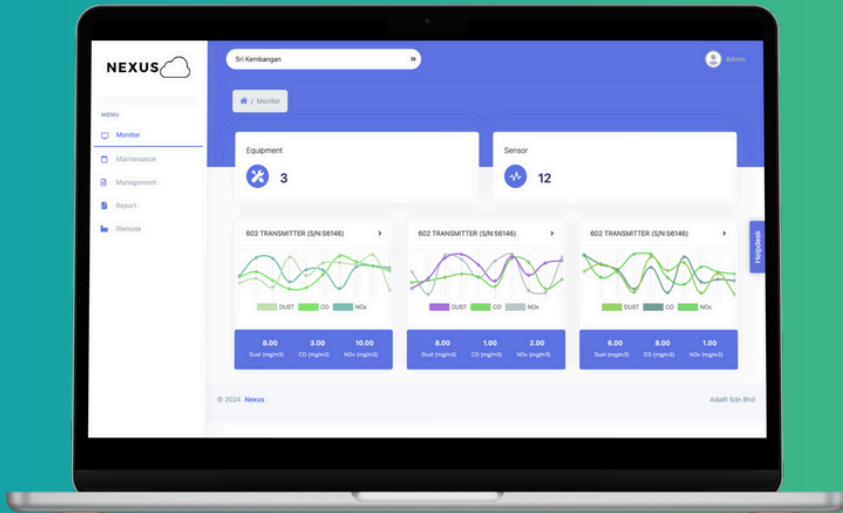

JKSurveyGroup : Surveyor Tracker System

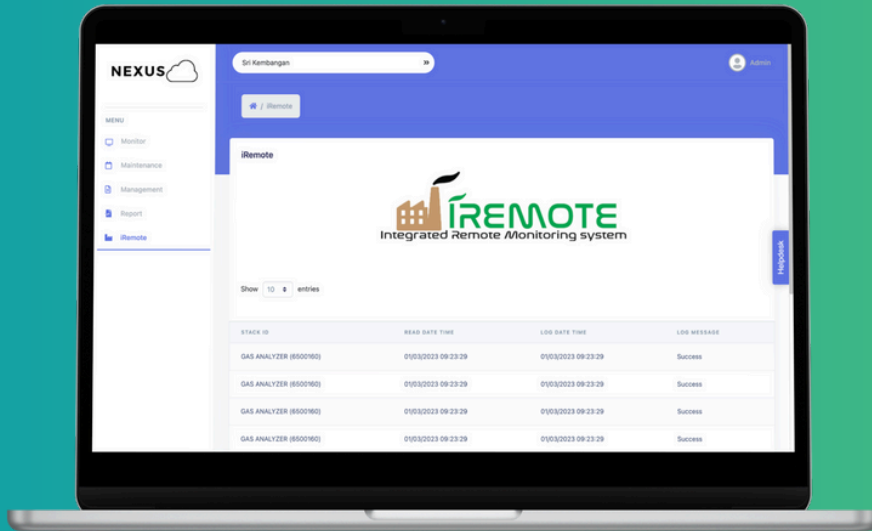

# PAST PROJECTS

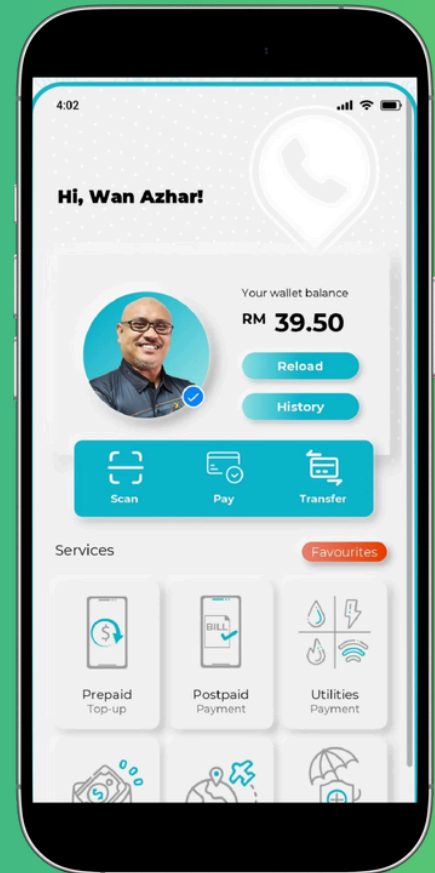

## System Integration

**Sensor Integration (Nexus) :** Centralized platform for connecting and monitoring multiple sensors to provide actionable insights.

**iRemote DOE Integration :** Facilitates compliance through integration with Malaysia's Department of Environment (DOE) for real-time emissions reporting.

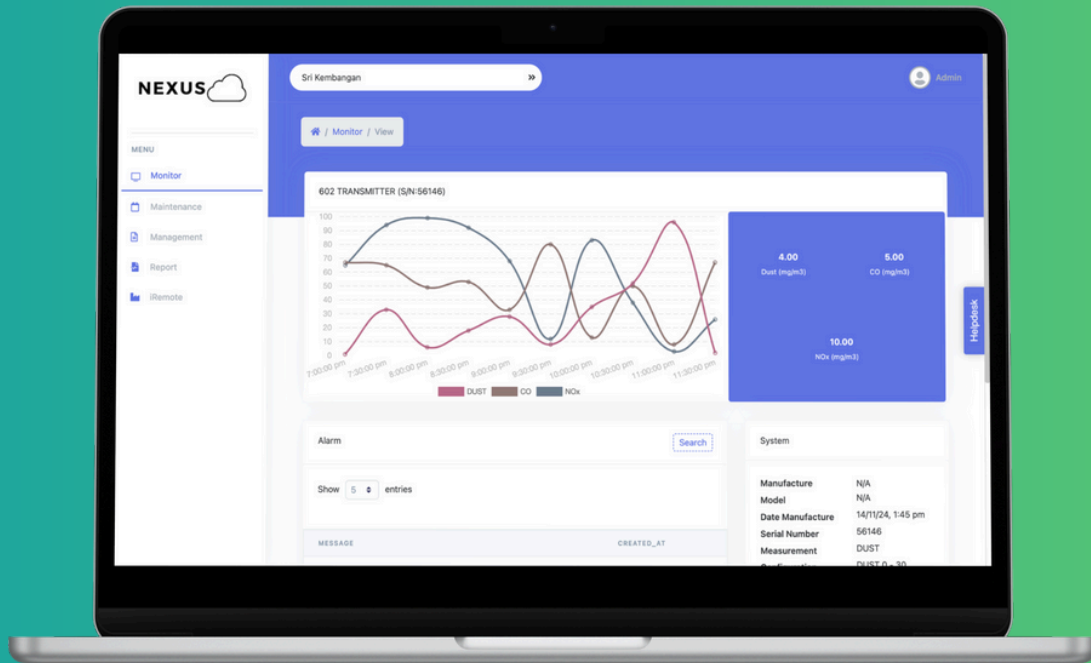

**BUAL EWallet : Digital Wallet System**

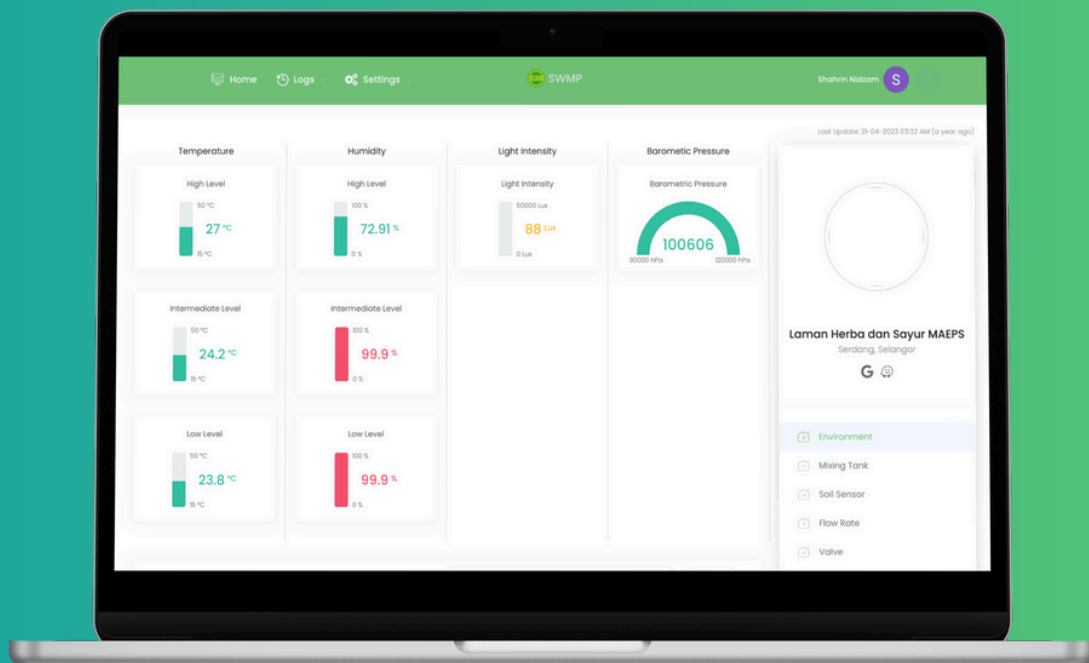

# PAST PROJECTS

## IoT Software Development

**Nexus : Comprehensive IoT platform for monitoring and data management**

**SWMP : Agriculture Fertigation IoT System**

# OUR TEAM

**Zairul Izran**

PROJECT MANAGER

Bachelor of Information Technology in Web System from Royal Melbourne Institute of Technology (RMIT) with more than 8 years of experience he has successfully managed multiple projects that focus on Server deployment, Network Management, NodeJs, PHP and MySQL.

**Shahrin Nidzam**

LEAD DEVELOPER

Bachelor Tech (Hons.) in Information and Communication Technology from University Teknologi Petronas (UTP) with the experience he gathered from Kisters AG German has made him a valuable team member and currently a Fullstack Developer that focus on Laravel framework, Ionic framework and multiple database such as MSSQL, MySQL and Oracle.

**Rasul Izzudin**

DEVELOPER

Bachelor of Engineering (Hons.) University Teknologi Mara (UiTM) a Software Engineer with more than 2 years of experience in web and mobile application development that include integration with electronics for an IoT device.

**Harith Suhaimi**

BUSINESS  
DEVELOPMENT
